Herts	<b>NHS No:</b>	462 910 2124
	<b>Endoscopist:</b>	Dr Mark Fullard
AL3 4JR	<b>Supervising Endoscopist:</b>	
	<b>ASA Status:</b>	1

<b>IV Medication</b> IV Midazolam 004.0 mg IV Buscopan	<b>Other Medication</b> Fentanyl 100 mcg Oxygen: 002 Litres
--	---

Co Morbidities: None

<b>INDICATIONS</b>	
<b>Planned Therapeutic Procedure:</b>	Insertion of stent

<b>EXAMINATION</b>	
Normal Examination	

### PROCEDURE PERFORMED

**Procedure:** OGD & Insertion of Stent Examination To: 2nd Part of Duodenum

### OUTCOME

Return for further procedures

### COMMENTS:

Stent came out easily after being in for 13 weeks. Suggestion of stricture at 27cms but lumen wide open . A further stent inserted (10cm fully covered Wallflex) under direct endoscopic vision plus fluoroscopy. Proximal end at 24cms. Remove in 12-14 weeks and consider either replacing with another stent or trying without for a period then.

Signed

**Dr Mark Fullard**  
**Consultant Gastroenterologist**
