http://www.ivorcatt.co.uk/em_pref.htm It was as I reflected on this that I 'saw' that a capacitor was in fact a transmission line and the whole universe began to turn itself inside out with the transmission line becoming the fundamental primitive while other concepts such as inductance, capacitance, and mutual inductance were constructed from it. - DSW

Theory C. **There is no electric current.** (In code.)

This is a misstatement. The true theory C merely states; "When a battery lights a lamp, electric current is not involved."

damaging, Davidson and Walton would survive untarnished to carry on the our
work and possibly still publish and lecture.
